

Mission District Rod and Gun Club Center Fire Benchrest Match Report: November 3, 2014

Well this took me a bit longer to report than usual, but politics got involved; I have two relatives running for office that I am helping out, so this has taken my time. Shooting is more fun than politicking, I can tell you that !And shooting was fun at our match, our second combo match of VFS and Group, but this time at 200 yards. And I know I always talk about the diabolical winds we have at Mission and I am afraid I must mention them again. This time the wind mostly came right over our heads towards the targets and since the range is littered with berms at 25, 50 and 100 yards our shots were riding the winds porpoising over those berms. Many of us had successive shots that were as much as an inch high and low. That was not always a problem in VFS, but it was a killer in group shooting. But we were delighted to have a full relay of 13 despite the windy and cold wet day that it was. I am going to let the results speak for themselves, but I thought I would include an equipment list this time so folks could see what we are actually shooting out here.

Our last match of the year, to be followed by a luncheon at Mission Springs will be December 7th. **For 2015 we will follow our First Sunday of each month schedule and have earned a full range closure for the morning, and I am happy to announce two Championship events for 2105. On May 3rd we will hold the First Annual Fraser Valley Group Shoot for Heavy Varmint at 100 and 200 yards, supported by Rick Pollock and the Calgary gang!! And on July 5th we will host the Third Annual Fraser Valley VFS Match, format TBA but get them into your calendar now. We have to limit both to 24 shooters for a one day event.**
