

**MDRGC BR50 Match Report July 26, 2014 (by Jim Latham)**

Our July match enjoyed another solid turnout of 14 shooters with several folks coming to see what we do that may be encouraged to join us in the future. Mentor/Guru Bob Goehring set everything up as usual, but did not shoot (that Doctor of his is a tough guy). When Bob does not shoot we are looking around to see who is there and what our chances are for a first place- that does not happen when Bob is there; then it is all about who will be second!

Maybe not so strangely a guy who often did come second was first today, Dave Harris. Besides that he used his superior voice and commanding presence to run the match drill sergeant style so we were finished very early again despite there being two relays. We try to keep pace because Dave will burst into a chorus of "Why are we waiting?" if someone is dragging a bit, and we all want to avoid hearing him sing that if possible! You remember the chalk on the blackboard; it is not that bad but.....

Leading the way with the factory sporters was Ray Parkin. Look closely and you will see that his scores bettered several full bench guns. Well done Ray!

As you can see the scores were not particularly high this match. There was a lot of very twitchy wind that changed so quickly that even with flags it was very difficult to get your shots away before they changed. Many were caught missing the changes because they were happening just as folks squeezed off. But as usual the group had a very good time and with our two relay system we are actually able to complete the scoring quickly because we can do all of the first relay and half of the second before the second relay comes for coffee and the usual excuses. We have a very highly honed system that comes from the cooperation of everyone and the leadership of Bob and Dave. Thanks everyone for making this efficient and fun!
